 GitHub: github.com/ofekcofman98  Portfolio

SUMMARY

- Full-Stack & AI Developer with experience building end-to-end applications across frontend, backend and data layers.
- Experienced in developing AI-powered workflows, integrating LLM APIs and building real-time web applications.
- Former Team Lead in Unit 8200, bringing ownership, problem-solving and fast learning into production environments.

TECH STACK

Languages: TypeScript, JavaScript, C#, Python	Backend: Node.js, Next.js API Routes, .NET, REST APIs	Frontend: React, Next.js, HTML, CSS
Databases: PostgreSQL	AI tools: Cursor, Claude, LLM tools, prompt-driven workflows	Cloud & DevOps: Docker, GCP, Git, GitHub
Messaging: RabbitMQ, Kafka		

PROJECTS

- VocalGrid - Voice-First Data Entry Platform,** (TypeScript, Next.js, React, Supabase, OpenAI)
- Built an AI-powered full-stack application enabling hands-free structured data entry into dynamic tables.
 - Designed real-time AI workflows integrating Speech-to-Text, LLM APIs, validation pipelines and database actions.
 - Developed responsive frontend components in React/Next.js with real-time user feedback.
 - Source code available on [GitHub](#) 
- Leads Management - Full-Stack Project,** (React, TypeScript, Python, PostgreSQL)
- Built a full-stack leads management platform for routing and processing business workflows.
 - Developed REST APIs, relational database models and validation systems for reliable data processing.
 - Implemented frontend interfaces in React and TypeScript for managing dynamic lead flows.
 - Source code available on GitHub: [Backend](#)  | [Frontend](#) 
- SQL Detective - Interactive SQL Learning Platform,** (C#, .NET, Unity, RabbitMQ)
- Developed and deployed a full client-server system for building and executing SQL queries with real-time validation.
 - Designed a modular query engine and dynamic mission system with complex state management.
 - Source code available on GitHub: [Client](#)  | [Backend](#)  | [Play](#) 

PROFESSIONAL EXPERIENCE

- Data Team Lead (Analytics & Automation),** Unit 8200 2017 – 2020
- Led a team building and optimizing large-scale data analysis systems using SQL and Python.
 - **Increased intelligence output** for national-scale missions by optimizing data pipelines and search algorithms.
- Data Analyst,** Maccabi Health Care Services 2021 – 2022
- Built and automated data pipelines using Python, SQL and Excel, improving data quality and enabling KPI-driven decision making across senior leadership and the Ministry of Health.

EDUCATION

- Bachelor's degree in computer science,** 2022 – 2025
The Academic College of Tel-Aviv, Yaffo
- Jumpstart Tech Training Program,** Wix 2026
- Hands-on training program covering modern web development topics including: AI agent workflows, React component architecture, async JavaScript, API integration, state management, CI/CD and deployment.
